

Thank you for purchasing this asset pack.

This package contains high-quality, game-ready 3D assets designed for use in Unity projects. All assets are optimized, properly scaled, and ready to drag and drop into your scene.

What's Included

- FBX meshes with proper pivots and scale
- PBR textures (2K and 4K resolutions)
- Materials for URP, Built-In, and HDRP
- Ready-to-use Prefabs
- Demo scene

Render Pipeline

The default pipeline is **URP**. Prefabs work immediately in URP projects.

For Built-In or HDRP projects, use the materials from the matching folder:

Your Pipeline	Use Materials From
URP	Materials / URP / (already assigned)
Built-In	Materials / BuiltIn /
HDRP	Materials / HDRP /

To switch: select your meshes or prefabs, open the Materials tab in the Inspector, and reassign materials from your pipeline's folder. Material names are the same across all three folders.
